KIMSEOJIN

dattol1136@yonsei.ac.kr | github.com/KSJcompany

EDUCATION

Yonsei University, Seoul Mar 2023 - Present
B.S. in Artificial Intelligence

RESEARCH INTERESTS

3D Computer Vision
- Monocular Depth Estimation, 3D Scene Reconstruction, and Novel View Synthesis

Video & Robot Learning
- Video Imitation Learning and Self-supervised Video Representation Learning

EXPERIENCES

Student Council of the School of Computing (Pil-Yeon) Jan 2026 – Present
Deputy Director, Education & Career Bureau
- Organized academic and career-oriented programs, including corporate site visits, joint conferences, and technical competitions
- Participated as on-site staff for the student orientation (OT), primarily responsible for guiding incoming freshmen and supporting event operations
- Managed internal communications and administrative tasks to support student-led academic initiatives

Visual AI Lab Sep 2025 – Present
Undergraduate Research Intern

StellaGo (Startup Team) Mar 2025 – Dec 2025
AI Engineer
- Responsible for data preprocessing and AI model-based analysis in accessibility service development
- Collected and processed Road View images and public facility data to improve accessibility for people with disabilities
- Scheduled to participate in the 2025 Korea Social Value Festa Conference

Yonsei Artificial Intelligence (YAI) Jul 2024 – Present
Vice President (16th, 17th) | 14th–17th Member
- Participated in weekly research sessions focusing on 3D Vision, Generative Models, and World Models
- Conducted paper and code reviews on state-of-the-art AI research
- Contributed to team projects, including a recipe generation model using food images
- Conducted a research project on video-based imitation learning using human motion videos

LG Aimers Jan 2025 – Feb 2025
Cohort 6
- Participated in an AI hackathon focused on predicting pregnancy outcomes using infertility patient data.
- Developed predictive models using various machine learning techniques and performed data augmentation to improve performance.
- Identified key features influencing pregnancy success through exploratory data analysis and feature engineering.

2024 Summer Digital Healthcare Bootcamp Jul 2024 - Jul 2024
Member
- Attended 5-day intensive program on AI applications in healthcare
- Collaborated on team project analyzing fMRI images for Alzheimer's disease severity assessment [Video]

Department of AI Student Council Feb 2024 – Aug 2024
Head of Finance Department
- Managed department's budget and prepared financial statements
- Oversaw financial aspects of events and participated in financial decision-making processes

Yonsei-Nexon RC Creative Platform Apr 2023 – Nov 2023
Team leader

- Managed team communication and prepared project reports
- Coordinated project exhibition and presentation

Department of AI Student Council Mar 2023 – Jan 2024
Finance Committee Member
- Participated in AI student council meetings and finance department meetings
- Assisted with departmental events as a student council member

HONORS AND AWARDS

Grand Prize (1st Place), 2025 First Half IHEI Festa (Social Value Category) Aug 2025
Institute for Higher Education Innovation (IHEI), Yonsei University
- Recognized for technical innovation and social impact of 'Suddenly Departing,' an AI-powered accessibility platform for wheelchair users.

Impact Foundation Award, Y-Compass Student Entrepreneurship Program Aug 2025
Impact Foundation
- Awarded for high potential in creating social value through an AI-driven urban mobility solution for wheelchair accessibility.

Innovative Tech Award, Tech for Impact Campus Jun 2025
Kakao Impact Foundation & Yonsei University
- Recognized for developing impactful AI solutions to address urban mobility challenges and social disparities.

SKILLS

Programming Languages
- Python, C++

Tools
- Deep Learning Frameworks : PyTorch
- Python Scientific Computing Libraries : numpy, matplotlib, etc.

Languages
- Korean (native), English(intermediate), Japanese (intermediate)
